

Inter University Accelerator Centre (IUAC) New Delhi

Workshop on

Fission studies using Neutron Detector Array & GPSC facility at IUAC

*March 28 – 29, 2016
IUAC ,New Delhi*

A two day workshop on study of fission dynamics using the National Array of Neutron Detectors (NAND) and scattering chamber (GPSC) facilities at IUAC will be organized during March 28-29, 2016 at IUAC, New Delhi. The NAND with 100 neutron detector array has been commissioned recently and experiments performed using heavy ion beams from Tandem+LINAC accelerators at IUAC. The aim of the workshop is to invite users/collaborators and discuss future research experiments on the study of fission dynamics using the scattering chamber & neutron detector array facilities. New proposals are invited for discussion. The workshop will contain invited talks and presentation by students. Those interested may apply by email.
